

DRIVER SAFETY AWARENESS PROGRAM

Can your drivers accurately assess their driving risk?

“The objective of the Program was to improve overall driving performance and safety by changing driver attitudes and reducing risks rather than by focusing on driving skills... I was extremely pleased with the way Susanne Haydon achieved the objective and I was impressed her professionalism and performance.”

**Christopher Peters, Manager Organisational and Workplace Development,
NSW Department of State and Regional Development**

Philosophy

Workplace driving is an Occupational Health and Safety issue. Fleet drivers, managers and employers need integrated strategies to ensure that all workplace drivers are safe drivers.

This workshop is suitable for all drivers of fleet vehicles, their managers, risk managers, insurance managers, OH&S managers, HR managers and fleet managers.

Benefits of the workshop

The workshop is designed to generate discussion between drivers and managers around:

- driver behaviours and attitude
- driving environments and vehicle control
- safe driving policies and procedures.

Workshop content

The workshop is designed to generate discussion between drivers and managers around:

- discovering key driver safety issues
- identifying and measuring risk
- devising low-risk driving strategies
- generating a personal work plan
- working towards ‘best practice’.

Competencies gained

A the completion of the program, participants are able to:

- Accureatly assess driver risk
- Recognise the real cost of unsafe driving practice
- Develop strategies to reduce driver risk
- Compile a personal work plan that reflects safe driving prxactice
- Assess organisational, manager and individual responsibilities in workplace driving
- Know the essential components of a safe driving policy

Workshop facilitator

Susanne Haydon is a senior education and training consultant who has spent the last 10 years developing and implementing education and training programs in road safety.

Susanne developed the *Driver Safety Awareness Program* with Lori Mooren and Phil Sochon, both road and fleet safety specialists devoted to safer driving practice in the workplace.
